Cambridge International
AS and A Level
British Model College (BMC) is a sister organisation of

A Centre of International Excellence

Cambridge International Examinations
Cambridge Associate School
British Model College (BMC) is a sister organisation of The British College (TBC). BMC, offering the prestigious Cambridge International GCE A level courses, was established in 2013. The A level is a two-year programme. The College is registered with Cambridge International Examinations as Centre Number NP 744 and has received approval from the Ministry of Education, Government of Nepal.

Subject choices offered at this College prepare students to enter engineering and medical colleges or for pursuing higher education in the liberal arts or pure science, as well as computer studies, accountancy and management faculties. Advanced Subsidiary Level General Paper remains a compulsory subject irrespective of the group of three principle subjects students may have elected to study plus Nepal Studies which is compulsory.

Located at the heart of the nation’s capital, we are fully dedicated to education and highlight this by providing seasoned faculty members, world class infrastructure and a friendly and nurturing educational environment for our students, whilst still ensuring an independent learning environment.

We adopt an adult approach to education where each student’s work is carefully monitored and evaluated to help ensure their success. BMC is arguably the best, most well-equipped and cutting edge A-Level college in the country.

Cambridge International AS and A Levels are internationally benchmarked qualifications providing exceptional preparation for commencement of university education. The Advanced Level is the ‘gold standard’ of Cambridge International Examination qualifications. It has exactly the same value in admitting students to all universities as its UK equivalent. It is also accepted universally as an entry qualification by universities including Nepal.

Studying for A level qualifications is rigorous and demands a high academic standard of achievement. BMC’s programmes offer highly flexible subject combinations. Students may choose any combination from the wide choice of subjects that suit their interest and aptitude. An A level course requires students to be creative and analytical.

The A-level programme demands a multi-dimensional approach, including:
- Providing evidence of in-depth subject knowledge and understanding;
- Developing an ability to think logically;
- Presenting reasoned explanations
- Applying theoretical knowledge; and
- Communicating ideas and feelings in a clear and logical manner.

EXAMINATION SYSTEM
The A and AS level final examinations are held twice a year in May/June and October/November, the results of which are published in August and January respectively.

Grading System
Students are expected to take at least four subjects including the General Paper and they may take more than the required credits depending upon their interests and capabilities. Students are assessed on a grade scale from A* awarded for the highest level of achievement, to E indicating the minimum required performance to constitute a pass, and U stands for ungraded which means fail.

Eligibility for the A-Level
Students who have taken the SLC/GCSE/CBSE or equivalent exams at the time of admission can apply. The main requirement is a sound academic ability to fulfill the rigours of this challenging programme. British Model College uses a comprehensive evaluation system to select a highly motivated group of students to join the programme.

BMC Scholarships
The College offers scholarships to highly meritorious but financially weak students. There are a limited number of scholarships for deserving candidates.

Course Combination
The College offers various subject combinations to fulfill any academic requirements and to prepare student for university studies, whether it’s science, medical, or business based degree.
